ETA 15/0911 issued on 22/02/2016

Page 2 of European Technical Assessment ETA 15/0911 of 09th of July 2018

English translation prepared by IETcc

This European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission according to article 25 (3) of Regulation (EU) No 305/2011.

SPECIFIC PART

1. Technical description of the product

The UIP wedge anchor MMA-II-SZ in the range of M6, M8, M10, M12, M14, M16 and M20 is an anchor made of galvanised steel. The UIP wedge anchor MMA-II-A2 and MMA-II-A4 in the range of M6, M8, M10, M12, M16 and M20 are anchors made of stainless steel of grades A2 and A4 respectively. The anchor is installed into a predrilled cylindrical hole and anchored by torque-controlled expansion. The anchorage is characterised by friction between expansion clip and concrete.

Product and product description is given in annex A.

2. Specification of the intended use in accordance with the applicable European Assessment Document.

The performances given in section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a mean to choosing the right products in relation to the expected economically reasonable working life of the works.

3. Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
MMA-II-SZ product performance for static or quasi	See annex C
static actions	
MMA-II-A2 and MMA-II-A4 product performance for	See annex D
static or quasi static actions	

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorages satisfy requirements for class A1
Resistance to fire	No performance determined

3.3 Hygiene, health and the environment (BWR 3)

This requirement is not relevant for the anchors.

3.4 Safety in use (BWR 4)

The essential characteristics regarding safety in use are included under the basic works requirement Mechanical Resistance and Stability.

3.5 Protection against noise (BWR 5)

This requirement is not relevant for the anchors.

3.6 Energy economy and heat retention (BWR 6)

This requirement is not relevant for the anchors.

3.7 Sustainable use of natural resources (BWR 7)

No performance assessed

4. Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base

The applicable European legal act for the system of Assessment and Verification of Constancy of Performance (see annex V of Regulation (EU) No 305/2011) is 96/582/EC.

The system to be applied is 1.

5. Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document.

The technical details necessary for the implementation of the AVCP system are laid down in the quality plan deposited at Instituto de Ciencias de la Construcción Eduardo Torroja.

Instituto de Ciencias de la Construcción Eduardo Torroja CONSEJO SUPERIOR DE INVESTIGACIONES CIENTÍFICAS

MMA-II-SZ, MMA-II-A2, MMA-II-A4 anchor

Product description

Annex A2

Installed condition and materials

Intended use

Anchorages subjected to:

• Static or quasi static loads: all sizes and embedment depths

Base materials:

- Reinforced and unreinforced concrete according to EN 206-1
- Strength classes C20/25 to C50/60 according to EN 206-1
- Uncracked concrete

Use conditions (environmental conditions):

- The anchor shall be used in dry internal conditions: all anchor types
- Structural subjected to external atmospheric exposure (including industrial and marine environment) and to permanent internal conditions with no particular aggressive conditions exists: screw types made of stainless steel with marking A4. Such particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used).

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete.
- Verifiable calculation rules and drawings are prepared taking into account of the loads to be attached. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static loads are designed for design Method A in accordance with:
 - ETAG 001, Annex C, edition August 2010 or
 - FprEN 1992-4:2016
- Size M8 in reduced embedment depth is restricted to anchoring of structural components which are statically indeterminate.

Installation:

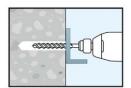

- Hammer drilling only.
- Anchor installation carried out by appropriately qualified personal and under the supervision of the person responsible for technical matters of the site.
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of aborted hole or smaller distance if the aborted hole is filled with high strength mortar and if under shear or oblique tension load it is not the direction of the load application.

2) Parameter relevant only for design according to ETAG 001, Annex C

³⁾ Pull out failure is not decisive

<u>Table D3: Characteristic resistance values to shear loads of design method A according to ETAG 001, Annex C or FprEN 1992-4 for MMA-II-A2, MMA-II-A4 anchor</u>

MMA-	II-A2, MMA-II-A4: STAINL	ESS STEEL		Performances					
ANCH	IOR			M6	M8	M10	M12	M16	M20
STEE	L FAILURE WITHOUT LEV	/ER ARM							
$V_{Rk,s}$	Characteristic resistance:		[kN]	6.0	10.9	17.4	25.2	47.1	73.5
$k_7^{1)}$	Ductility factor:		[-]				1.0		
γм,ѕ	Partial safety factor		[-]			1	.52		
STEE	L FAILURE WITH LEVER	ARM							
$M^0_{Rk,s}$	Characteristic bending mom	ent:	[Nm]	9.2	22.5	44.9	78.6	200	389
γм,ѕ	Partial safety factor:		[-]	1.52					
CONC	RETE PRYOUT FAILURE								
k ₈ ¹⁾	k factor:	for hef,std	[-]	1.0	1.0	1.0	2.0	2.0	2.0
$k^{2)}$	K factor.	for hef,red	[-]	-	1.0	1.0	1.0		
$\gamma_{ins}^{1)}$ $\gamma_2^{2)}$	Installation safety factor:		[-]				1.0		
CONC	RETE EDGE FAILURE								
lf	Effective length of anchor	for hef,std	[mm]	40	48	55	65	84	103
	under shear loads:	for h _{ef,red}	[mm]		35	42	50		
d _{nom}	Outside diameter of anchor:		[mm]	6	8	10	12	16	20
$\gamma_{ins}^{(1)}$ $\gamma_2^{(2)}$	Installation safety factor:		[-]				1.0		

¹⁾ Parameter relevant only for design according to FprEN 1992-4

Table D4: Displacements under tension loads for MMA-II-A2, MMA-II-A4

MMA-II-A2, MMA-II-A4: STAINLESS STEEL		Performances						
ANCHOR		M6	M8	M10	M12	M16	M20	
Standard embedment depth								
Tension load in non cracked concrete:	[kN]	4.3	5.7	6.3	9.9	13,8	19.8	
δ _{N0} Displacement:	[mm]	0.42	0.22	0.17	0.19	0.19	0.11	
	[mm]	1.33	1.33	1.33	1.33	1.33	1.33	
Reduced embedment depth								
Tension load in non cracked concrete:	[kN]		4.2	5.7	7.6			
δ _{N0} Diaple coments	[mm]		0.07	0.04	0.32			
Displacement: δ _{N∞}	[mm]		0.60	0.60	0.60			

Table D5: Displacements under shear loads for MMA-II-A2, MMA-II-A4

MMA-II-A2, MMA-II-A4: STAINLESS STEEL		Performances						
ANCHOR		M6	M8	M10	M12	M16	M20	
Standard embedment depth								
Shear load in non cracked concrete:	[kN]	2.8	5.1	8.1	11.8	22.1	34.5	
	[mm]	1.66	1.79	3.83	4.13	5.75	6.59	
	[mm]	2.49	2.68	5.74	6.19	8.62	9.88	
Reduced embedment depth								
Shear load in non cracked concrete:	[kN]		5.1	8.1	11.8	-		
	[mm]		0.60	3.83	4.13			
	[mm]		0.90	5.74	6.19
